

Development & implementation of a “Sustainable building and subsidising” Standard

Keywords	Sustainable building, Eco-design	
Photos		
Objectives	Incentive to improve the environmental quality of buildings, public spaces and roads in Essonne by conditioning departmental funding to use a “Sustainable building and subsidising” toolbox (pre diagnosis, quantified standards, results of operation).	
Description	<p>On the basis of 10 objectives of the Charter "Sustainable building and subsidising", the General Council has developed (with the financial support of the European program LIFE +) a toolbox for all building operations (construction or renovation) of public spaces or roads, for better integration of environmental quality in the programming phase (pre diagnosis), design (quantified standards) and construction (results of operation).</p> <p>These elements determine conditions for the attribution of grants within the framework of the departmental investment for communities of Essonne.</p>	
Results / Accomplishments	At the end of August 2014, 110 operations are integrating this chart (100 external, 10 internal)	
Tips for Reproducing the Action	<ul style="list-style-type: none"> Working with instructional services on the development of standards and verification modes
